

ARIEL GIANATIEMPO

Senior React Developer | Performance & Front-End Architecture

Málaga, Spain | Italian citizen | Open to fully remote roles across Europe

+34 665 861 221 | gianatiempo@gmail.com | linkedin.com/in/gianatiempo | arielgianatiempo.com

PROFILE

Senior front-end developer with 8 years of React experience across banking, cybersecurity and healthcare products. Track record of owning front-end architecture end to end, leading large-scale migrations, rewriting MVPs and raising engineering standards across teams, including a migration that delivered a 60% performance gain and a refactor that cut bugs by 90%. Currently building a full product rewrite that I proposed, negotiated and architected, using AI-assisted development. Comfortable as technical lead, mentor and hands-on individual contributor in distributed Agile teams.

CORE SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Next.js, Astro, HTML5, CSS3

Architecture & State: Hexagonal Architecture, REST API integration and contract specification, Redux, React Query, Apollo GraphQL

AI & Tooling: AI-assisted development (Claude Code), prompt engineering, Python (foundational), Figma

UI Libraries: Ant Design, Material UI, Styled Components, Tailwind CSS

Testing & Tooling: React Testing Library, Vitest, Playwright, MSW, Vite, Webpack, ESLint, Prettier, Git

Ways of working: Technical leadership, mentoring, code standards, Agile/Scrum

Languages: Spanish (native), English (C2 Proficient), Italian (proficient)

PROFESSIONAL EXPERIENCE

Senior Front-End Developer — Plexus Tech

Jul 2025 – Present | Remote (Spain) | IT consulting: Openbank Digital Services (ODS), Santander Group

- Maintain and evolve four core areas of Openbank's homebanking platform: accounts, deposits, contracting and customer profile.
- Upgraded the team's ESLint setup from v8 to v10 and extended the internal ESLint plugin with new standard and custom rules, raising code quality consistently across all four projects.
- Identified component duplication across the four codebases and proposed a shared component library; the proposal was adopted immediately and aligned with an existing company initiative.
- Deliver continuous accessibility (a11y) fixes, technical debt refactoring and new features within a Hexagonal Architecture codebase, using AI-assisted development tooling in daily delivery.

Stack: React, TypeScript, Styled Components, Hexagonal Architecture, React Router, Kubit, React Testing Library, ESLint, AI-assisted development

Senior Front-End Consultant — V3 Cybersecurity

Apr 2023 – Present | Remote (part-time) | Cybersecurity

- Rewrote the company MVP on joining, migrating to Ant Design and a modernised dependency stack, delivering a 60% performance improvement plus significant reductions in build and development time.
- Built the case for a full frontend and backend rewrite after years of feature growth left the product inconsistent and constrained by its original backend; secured approval following months of negotiation with leadership, backed by my manager.
- Defined the application layout, screen structure and product philosophy, then directed a hired designer in producing Figma prototypes for every page, section and feature.
- Architected the new frontend so each UI section is independent and backed by its own endpoint where possible, prioritising reusability across areas, and specified the data contracts now being implemented by the Ruby on Rails backend team.
- Building the new frontend from scratch as sole developer, using AI-assisted development to sustain full-application scope single-handedly; targeting launch by end of 2026.

Stack: React, TypeScript, Vite, Ant Design, React Query, React Testing Library, Vitest, MSW, API contract specification, Figma, AI-assisted development

Senior Front-End Developer — System One

Jul 2022 – Feb 2024 | Remote | Healthcare

- Stabilised the Material UI integration by upgrading from early beta to stable release, resolving long-standing bugs at their root cause.
- Overhauled two core application areas, reducing reported bugs by 90% within two weeks of release and reaching full stability in both.
- Built a standalone Playwright + Cucumber + TypeScript project that enabled the QA team to write automated regression tests independently.

Stack: React, JavaScript, Redux, Redux-Thunk, React Query, Material UI, Playwright, Webpack, React Testing Library

Senior Front-End Developer — Austin Software (now Howdy)

Dec 2021 – Jun 2022 | Remote | IT consulting: Pharmacy platform

- Defined and rolled out coding standards across an entire monorepo using ESLint and Prettier, then updated the codebase to comply.
- Introduced TypeScript to the front-end application, authored the type definitions for the migration and trained the team on the new tooling.

Stack: React, TypeScript, Apollo GraphQL, Axios, Material UI, React Testing Library, ESLint, Prettier

Senior Associate / Technical Lead — J.P. Morgan Chase

Nov 2019 – Nov 2021 | Buenos Aires, Argentina | Banking | Promoted twice from Associate Software Developer

- Led a team of three (later six) React developers through a Flex-to-React migration, eliminating every deprecated component within eight months.
- Contributed to a greenfield application: proposed architectural improvements, established linting rules and coding standards, and refactored the full test suite.
- Served as technical lead and mentor for a six-developer internship programme, guiding it from analysis through to production release; also evaluated candidate coding exercises for hiring and led an internal React best-practices Ignite group.
- Designed a user claims tracking system, cut local build time by 50% through tooling improvements, and refactored the state management architecture to remove duplication and technical debt.

Stack: React, TypeScript, JavaScript, React Query, Redux, Apollo GraphQL, Material UI, Vite, MSW, React Testing Library

Web UI Developer — Globant

Sep 2018 – Oct 2019 | Buenos Aires, Argentina | IT consulting

- Led development of an internal product and championed team-wide best practices. Contracted out to J.P. Morgan, where the quality of the work led directly to a permanent offer.

Stack: React, JavaScript, Redux, Axios, Material UI, Git

EARLIER PROFESSIONAL EXPERIENCE

Front-End Developer — Tecnosoftware | Mar 2018 – Aug 2018

Delivered new features and refactored the codebase to prepare a migration to a new stack. AngularJS, JavaScript.

Front-End Developer — Buffa Sistemas | May 2016 – Feb 2018

Maintained custom jQuery plugins, built interfaces and landing pages with UX/UI teams, trained new joiners. jQuery, AngularJS, Sass, Grunt.

Web Developer — Redbee | Mar 2015 – Apr 2016

Full-stack work: API endpoints plus front-end components and services. AngularJS, jQuery, Sass.

Java Developer (Jr to Sr) — Hewlett-Packard, FDV Solutions, GetSense, Cubika, Teracode | May 2007 – Feb 2015

Eight years of back-end development for airline and enterprise clients: API endpoints, features and legacy migrations. Java, Spring, Hibernate, Wicket, MySQL.

EDUCATION & CERTIFICATIONS

Information Systems Engineering (not completed) | Universidad Tecnológica Nacional | 1997 – 2001

Full Stack Development with Integrated AI | OpenWebinars | 2026

Generative AI Agents | OpenWebinars | 2026

Claude Platform 101 & Claude Code 101 | Anthropic | 2026 (IDs qr4qcgake3r7, 2j3zkkwxh3r3)

AWS Certified Cloud Practitioner (CLF-C02) exam prep | LinkedIn | 2026

Python for Data Science, AI & Development | IBM | 2024 (ID 27LMMTYUYAEW)

EF SET English Certificate (C2 Proficient) | EF SET | 2024

React – The Complete Guide (incl. Next.js & Redux) | Udemy | 2024
